THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:
upon close review of the claims, the prior art, and applicant's remarks in the After Final Amendment filed on 3-30-2009, it appears that the allowance of claims 47, 61, and 62 are appropriate.

The prior art of Gallant, used in the outstanding office action, appears to disclose a communication system comprising at least one subscriber area within an overall area stipulated and having allocated at least one subscriber number and at least one radio cell in the overall area that transmits a signal containing coordinates to a mobile user unit within the system, and means for calculating whether the coordinates transmitted by the radio cell lie within the subscriber area (col. 3, lines 7-33; col. 7, lines 32-67; col. 8, lines 14-44 and lines 51-55; col. 10, lines 10-33) rather than '...calculating and determining whether absolute difference between the coordinates transmitted by the radio cell and said at least one subscriber area exceed a predetermined value, and if the predetermined value is not exceeded, calculating and determining whether square of said difference exceeds square of said radius...' and '...the subscriber area is stipulated by a) checking a first and second code, wherein the first code signals whether the user unit is authorized for the subscriber area, and the second code signals whether a stipulation has already taken place relative to the subscriber area; b) selecting the radio cells present around the user unit based on signal strengths; c) recording the radio cell currently used for switching; d) determining urban network code and cell code (cell-ID) based on the recorded radio cell; e) transmitting the urban network code and cell code to a centralized point of the network unit and simultaneously storing address of the centralized point in a subscriber code (SIM); f) determining location and

Art Unit: 2614

local radius based on a file provided in a centralized point containing all radio cells; g) generating a subscriber file within the centralized point, which is write protected; h) transmitting the location and local radius to the subscriber code module of the user unit; and i) updating the location and local radius stored in the user unit...'. Therefore, Gallant does not meet the requirements of the claimed invention.

Further, it would be contrary to the teaching in Gallant to modify the prior art to disclose:

'...the subscriber area is stipulated by a) checking a first and second code, wherein the first code signals whether the user unit is authorized for the subscriber area, and the second code signals whether a stipulation has already taken place relative to the subscriber area; b) selecting the radio cells present around the user unit based on signal strengths; c) recording the radio cell currently used for switching; d) determining urban network code and cell code (cell-ID) based on the recorded radio cell; e) transmitting the urban network code and cell code to a centralized point of the network unit and simultaneously storing address of the centralized point in a subscriber code (SIM); f) determining location and local radius based on a file provided in a centralized point containing all radio cells; g) generating a subscriber file within the centralized point, which is write protected; h) transmitting the location and local radius to the subscriber code module of the user unit; and i) updating the location and local radius stored in the user unit...', as cited in claim 47; and

'...calculating and determining whether absolute difference between the coordinates transmitted by the radio cell and said at least one subscriber area exceed a predetermined value, and if the predetermined value is not exceeded, calculating and determining whether square of said

Art Unit: 2614

difference exceeds square of said radius...' as cited in claims 61 and 62, because Gallant only discloses means for calculating and determining whether transmitted coordinates for a radio cell overlap a stipulated subscriber area.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
